

POWER-PACKER®

Power-Packer is your experienced partner when it comes to motion control systems for agricultural machinery and precision farming technologies. We offer a complete range of electro-hydraulic actuators for all your applications involving adjustment, positioning and control. Our systems are the product of continuous investigation into customer applications and technologies. Power-Packer's broad know-how and continuous search for innovation in motion control systems guarantees you PROGRESS IN MOTION!

AN
Actuant
COMPANY

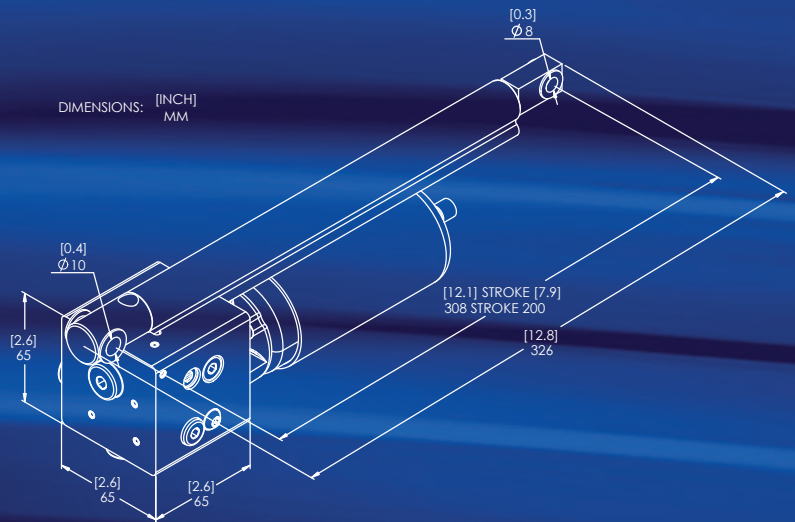

Benefits

- High forces in a compact design
- Plug and Play, only electrical power supply needed
- Impact resistant, optional shock-absorption
- Independent power-pack for the application, no disturbance from other functions
- Easy control over the application, optional sensors for pressure and position detection
- Proven high quality, high endurance
- Easy to integrate, flexible design
- Closed system, lower risk of contamination, maintenance-free

The Mini Electric Drive Unit is a self-contained system designed to meet the highest requirements of the agriculture industry. It is a stand-alone combination of a cylinder and a power-pack. It has been designed to perform in harsh environments with limited build-in space where high efficiency, precision and impact resistance are necessary. Power-Packer's actuators are robust, reliable, maintenance-free and easy to install.

SPECIFICATIONS

Maximum dynamic push forces up to 5 kN [1,124 lbf]

Double acting cylinders, various strokes and speeds possible

Integrated relief valves and check valves

E-motors: 12 V DC, 24 V DC

Optional CAN Bus

Optional pressure, position and temperature sensors integrated

Optional integrated shock absorption

Corrosion resistance materials

Ingress protection realized up to IP 67
